Quotify 2.0

Save Your Quotes

Your personal library for the quotes that move you, shown back to you every day on your Home Screen.

Available Monday, October 26, 2026

About Quotify

Quotify is your personal library for the words that move you. Save quotes from books, articles, podcasts and conversations, then see them again every day on your Home Screen and Lock Screen. Quotify 2.0 is the biggest update since launch: it makes saving a quote effortless and seeing it again more personal.

What's new in 2.0

- **Smart Photo to Quote:** take or choose any photo, like a book page, sign or screenshot, and Quotify pulls the quote, author and page (Premium)
- **A fresh new design** built on Liquid Glass, with cleaner quote rows. Tap a quote to share it, or swipe and long-press for quick actions
- **Pick which quotes your widgets and reminders show,** by any field you've added (Premium)
- **Organize quotes with your own fields,** then filter or sort your library (fields are Premium)
- **Your own photo** behind widgets and share images (Premium)
- **Widgets look right** on tinted and clear Home Screens, and Text Size now changes the quote size
- **A new Share Quote sheet** with Story, Square and Wide images, an accent color, and straight-to-Instagram Stories sharing
- **Multiple daily reminders** at the times you choose, now with the author (Premium)
- **Spotlight, Siri and Shortcuts** support
- **Saved links** show as a website name you can tap to open
- **Ready for iPhone Duo**
- **iCloud sync status** in Settings, and replay the welcome tour anytime
